Subject: Phone call from BLM regarding Rowely seeding

On Monday, October 20, 2003, Mike Nelson of the BLM gave me a call and stated that the BLM will authorized the seeding of the BLM portion of the Rowely reclamation project under an emergency seeding (similar to a fire). Mike gave me the go-ahead to order the seed. I asked if we needed to alter the seed mix - his response was that he had several people look at it and all of them thought it was an appropriate mix to use on the site without any changes.

I have now ordered the seed for the entire project.
